Re: Supplement to Application (Resource Report 3)
Floridian Natural Gas Storage Company, LLC
FERC Docket No. CP08-13-000

Dear Ms. Bose:

In connection with the Application of Floridian Natural Gas Storage Company, LLC ("FGS") for a certificate of public convenience and necessity to construct, own and operate a new natural gas storage facility filed on October 31, 2007 (the "Application") in the above-referenced docket, FGS hereby submits the attached June 24, 2008 Response of the United States Fish and Wildlife Service ("USFWS"). The USFWS Response is to the request of FGS that USFWS review and analyze impacts to threatened and endangered species on the Tampa Farms property, which request was previously submitted to FERC on May 13, 2008 as Attachment 1 to the FGS Response to Motion to Intervene and DEIS Comments of Panagioti Tsolkas and Palm Beach County Environmental Coalition. Today's filing of this June 24 USFWS Response supplements FGS's May 5, 2008 Responses to DEIS Recommendations (specifically Recommendation 12) and FGS's May 13, 2008 filing of FGS's request to USFWS, as well as Appendix 3-C to Resource Report 3 (in Volume II-D of the Application).

FGS's submission contains only Public material and FGS is making this filing electronically. Electronic copies of this filing are being sent by email to all parties to this proceeding, as well as to the persons identified below.

If you have any questions about any of these submissions, please do not hesitate to contact me at (202) 420-2745 or Beth Webb at (202) 420-4782.

Sincerely,

/s/ Joan M. Darby

Date Received:	June 23, 2008
Project:	
County:	Martin

Dear Mr. Bullock:

The U.S. Fish and Wildlife Service (Service) has received your letter dated May 13, 2008, for the project referenced above.

PROJECT DESCRIPTION

The project involves the construction of a natural gas storage facility with a capacity of up to 8,000,000 dekatherms per day. The project will also include a liquefaction and revaporization facilities, and two 4-mile pipelines to connect with existing natural gas pipelines with metering facilities. In your letter you indicate that the project sponsor has also proposed to establish a temporary construction staging area within a 10.5-acre site located adjacent to the existing transmission right-of-way and pipeline route. The staging area is comprised of agricultural lands used for hay production. The project is located in Martin County, Florida.

THREATENED AND ENDANGERED SPECIES

The Service has queried our database, and we do not have records of federally-listed species occurring within the proposed construction staging area. Moreover, the Service notes that the proposed staging area is currently used for hay production and does not appear to provide habitat for federally-listed species. Based on the information provided, the Service believes that the use

of the proposed construction staging area in association with the project will not increase risk to federally-listed species.

Thank you for the opportunity to comment. If you have any questions, please contact John Wrublik at 772-562-3909, extension 282.

Sincerely yours,

John M. Wrublik
