RE: INDIANTOWN NATURAL GAS STORAGE PROJECT

Dear Mr. Williams,

On behalf of the Board of Directors of the Indiantown Western Martin County Chamber of Commerce, I thank you for the presentation describing your proposed natural gas storage project near Indiantown. We are pleased that you have included Indiantown and Martin County representatives in the early stages of your development plans. Indiantown and Martin County are interested in attracting new businesses that fit into the economic development plan laid out by our leadership. Indiantown and Martin County are also very protective of the environment and the quality of life of our citizens so these are issues we monitor closely.

We now have an improved understanding of the scope and intent of your proposed liquified gas storage project and are interested to learn more as your plans progress. Based on the representations in your presentation and explanations we are supportive of your efforts to site your gas storage project at the former Florida Steel site. We understand that there are many commercial issues that have to be further defined and that there will be an extensive permitting process to work through with federal, state and local authorities. The residents of Indiantown and the members of the Chamber will follow this review process closely and we thank you for your open approach and direct communications so far.

We look forward to continued communication on this development project. We also understand the value of having new companies locate near Indiantown that both fit into our growth plans and as a good corporate neighbor that provides support to our citizens and community. Under the circumstances described, we believe that Floridian Natural Gas Storage will be a good addition to our community and wish you success with your development efforts

Sincerely,

**Allon Fish
President/CEO**
