	§	CP07-____-000
Floridian Natural Gas Storage Company, LLC	§	CP07-____-000
	§	Expedited Action Requested

NOTICE OF ABBREVIATED APPLICATION FOR
CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY
FOR A NEW NATURAL GAS STORAGE FACILITY
AND FOR BLANKET CERTIFICATES
AND FOR APPROVAL OF MARKET-BASED RATES

(November __, 2007)

Take notice that on October 31, 2007, Floridian Natural Gas Storage Company, LLC, 1000 Louisiana Street, Suite 4361, Houston, Texas 77002 (FGS), filed in Docket Nos. CP08-____-000, CP08-____-000, and CP08-____-000, an application under section 7 of the Natural Gas Act (NGA) and Parts 157 and 284 of the Federal Energy Regulatory Commission's (Commission) regulations for, respectively, a certificate of public convenience and necessity authorizing the construction and operation of the Floridian Natural Gas Storage Project (FGS Project); a blanket certificate to perform certain routine activities and operations; and a blanket certificate to provide open access firm storage services.

The proposed FGS Project would be located on approximately 145 acres at the site of the former Florida Steel manufacturing facility (Site), about two miles north of Indiantown in Martin County, Florida. The FGS Project would include the initial construction of one nominal 190,000 m³ liquefied natural gas storage tank, liquefaction systems, vaporization systems and two parallel pipelines, one to receive gas and one to send out gas, both approximately four miles in length, that would connect the facility with the regional gas infrastructure, running from the Site to interconnections with Gulfstream Natural Gas System, L.L.C. and with the Florida Power and Light Company 20-inch lateral that connects with the mainline of the Florida Gas Transmission Company.

FGS is seeking approval of the two planned phases of the FGS Project. Upon planned commercial operation in late May 2011, the Phase 1 Project will make available liquefied natural gas storage capacity of 4 Bcf, with a design sendout capacity of 400 MMscf/d and a design liquefaction rate of 50 MMscf/d.

Phase 2 of the FGS Project would involve the construction of a second, identical storage tank and additional liquefaction and vaporization capacity. Commercial operation of Phase 2 is anticipated no later than March 2016, but may be advanced to such earlier date as the market may require.

The FGS Project is more fully described as set forth in the application that is on file with the Commission and open to public inspection. The instant filing may be also viewed on the web at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, call (866) 208-3676 or TTY, (202) 502-8659.

On January 10, 2007, the Commission staff granted FGS's request to utilize the Pre-Filing process and assigned Docket No. PF07-3-000 to staff activities involving the FGS Project. Now, as of the filing of the October 31, 2007 application, the Pre-Filing Process for this Project has ended. From this time forward, these proceedings will be conducted in Docket Nos. CP07-____-000, CP07-____-000, and CP07-____-000 as noted in the caption of this Notice.

There are two ways to become involved in the Commission's review of this Project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this Project should, on or before the below listed comment date, file with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, D.C. 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 14 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this Project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the Project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this Project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

Motions to intervene, protests and comments may be filed electronically via the internet in lieu of paper; see, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link. The Commission strongly encourages electronic filings.
